

Analyst Training Program

Fall 2019 Trainees
8th Edition

John Lin King

John is a Ph.D candidate in Neuroscience at the University of California, at work in the laboratory of David Julius. There, his research centers on using animal venoms as both probes to unravel the inner workings of the human body's pain-detection system and tools for the development of pain medication. He received his undergraduate degree from the University of Chicago, where he researched the body's innate ability to combat brain diseases such as Alzheimer's. His scientific interests include the identification and development of novel biological probes for understanding and treating human diseases.

Andoni Mourdoukoutas

Andoni is a Ph.D candidate in the joint UC Berkeley and UCSF Bioengineering Graduate Program in the lab of Amy Herr. There, his research focus is on developing novel bioinstrumentation methods for quantitative biology and medicine. He received his B.E. in Biomedical Engineering and Minor in Economics from The City College of New York. He enjoys visiting his family in Greece.

Priya Choudhry, Ph.D.

Priya is currently an Intern at Genentech in Product Development. Prior to that, she worked at UCSF School of Medicine in oncology, where she studied Daratumumab-resistant Multiple Myeloma. She completed her postdoc at Caltech where she used proteomics to identify the role of glycosylation in oncogenesis.
